

POOJA SATTIGERI

Software Engineer | Backend Developer | AI/ML Enthusiast

[LinkedIn](#) | [GitHub](#) | poojasattigeri83@gmail.com | +91 7996146695

PROFESSIONAL SUMMARY

MCA graduate with hands-on experience as a Software Development Engineer Intern, building backend and full-stack applications using Python, FastAPI, PostgreSQL, and Docker. Applied AI/ML through computer vision (YOLOv8, CNN) and a Scikit-learn-based prediction pipeline for carbon-credit estimation. Seeking a Software Engineer, Backend Developer or AI/ML Engineer role.

TECHNICAL SKILLS

AI/ML & Computer Vision: YOLOv8, CNN, OCR, Scikit-learn, Pandas

Languages: Python, Java

Backend: FastAPI, REST APIs, JWT Authentication, API Development

Frontend: HTML5, CSS3, JavaScript, React, React Native

Databases: PostgreSQL, MySQL, SQLite

Tools & DevOps: Git, GitHub, Docker, Postman

Currently Learning: LLM Engineering, RAG, QLoRA, Agents

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern — ArkaShine Innovations Pvt. Ltd.

Apr 2026 – Jul 2026

Bengaluru, India

- Developed REST APIs using FastAPI with JWT authentication.
- Designed and maintained PostgreSQL and MySQL database schemas.
- Built OCR-based document processing workflows for structured data extraction.
- Integrated Weather APIs and automated PDF report generation.
- Used Docker, Git/GitHub, and Postman for development and API testing.

PROJECTS

AI Climate Intelligence & Carbon Credit Ecosystem Platform | [Pooja332211/Carbon-Credit-App](#)

React Native (Expo), TypeScript, FastAPI, Python, SQLite, Scikit-learn (ML pipeline), OpenWeatherMap API

- Built a full-stack platform (React Native/Expo frontend, FastAPI backend) to estimate carbon credits and ESG scores from farm assessment data.
- Implemented an ML prediction pipeline (dataset generation, model training, model inference) for carbon-credit estimation, combined with rule-based ESG scoring and real-time weather integration.
- Connected AI recommendations and an ESG marketplace screen dynamically to live-calculated carbon credit and profile data, with functional navigation across assessment, analytics, and reporting modules.

HarvestLenz — AI Fruit Quality Grading System | [Pooja332211/HarvestLenz](#)

FastAPI, Flutter, YOLOv8, CNN, JWT

- Built an end-to-end computer vision pipeline (image upload → YOLOv8 multi-fruit detection → per-fruit cropping → CNN-based quality classification) with a FastAPI backend and Flutter mobile client.
- Implemented JWT authentication and a digital fruit-passport/report flow, with configurable rule-based shelf-life and market-recommendation logic and automated PDF/JSON reporting.

Soil Intelligence & Nutrient Prediction Platform | [GitHub \(SoilENZ\)](#) | [GitHub \(Nutrient Prediction\)](#)

FastAPI, SQLAlchemy, Pydantic, PostgreSQL/SQLite, React, Python, Scikit-learn, Docker

- Built a FastAPI + Pydantic backend (SoilENZ) that turns OCR-extracted soil-report data into a soil-health score with crop-specific recommendations and automated PDF reports.
- Built a companion FastAPI service (Soil Nutrient Prediction Platform) that predicts nutrient values from spectral sensor readings using a configurable similarity/distance-based logic engine, validated via scikit-learn cross-validation (MAE/RMSE/R²) with PDF/Excel export.

EDUCATION

Master of Computer Applications (MCA)

2024 – 2026

KLE Technological University | CGPA: 8.66/10

Bachelor of Computer Applications (BCA)

2021 – 2024

KLS Gogte College | CGPA: 8.42/10

CERTIFICATIONS & ACHIEVEMENTS

- AI Engineer Core Track: LLM Engineering, RAG, QLoRA, Agents — Udemy, July 2026
- Infosys Hackathon, Hubli (2025) — Built an E-Waste Management solution using design thinking and rapid prototyping.
